

# Rakarrack

Y. Collette (ycollette.nospam@free.fr)  
<https://audinux.github.io>

# Introduction

Rakarrack (plus) is a multi-effect for guitar. A little bit similar to guitarix.

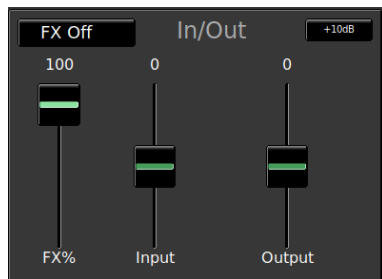

Rakarrack is really interesting for creative sound.

It has some really interesting effect Guitarix has not.

In the mean time, rakarrack is a little bit less efficient with distortion / overdrive than Guitarix.

# Jack View

Audio Input

Aux Input

MIDI Input

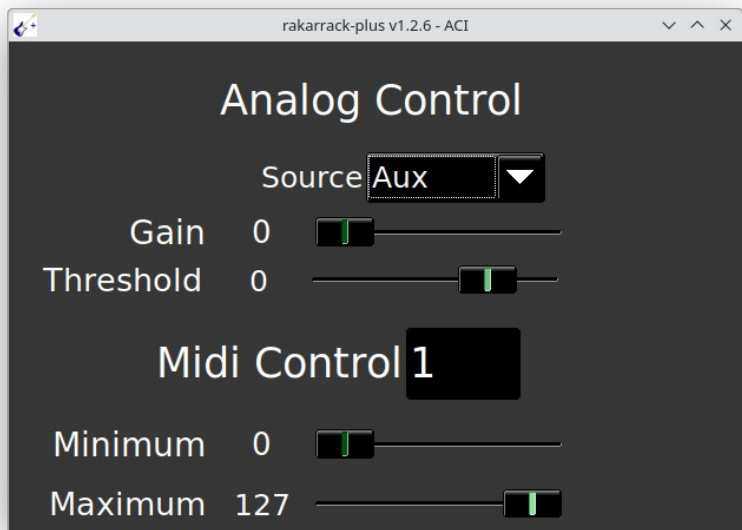

Audio Output

MIDI Output

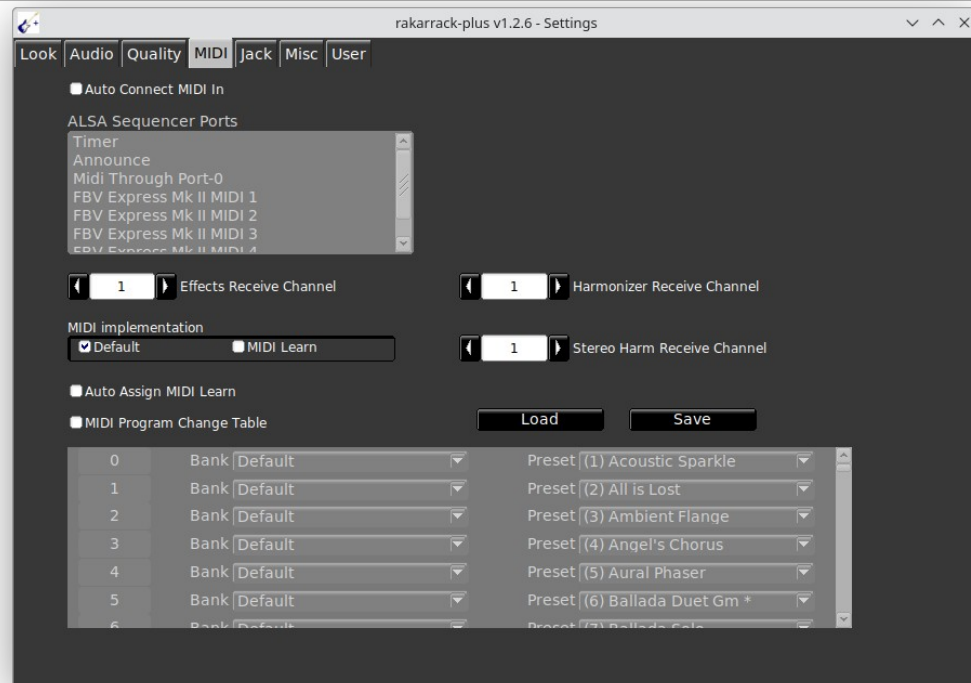

The Aux input is mainly dedicated to vocoder but can also be used with the 'ACI' (Analog Control Input → Settings / ACI)

# Control Parameters

The ACI allows you to generate a MIDI signal via an audio signal sent to the AUX input.

This MIDI Windows allows you to select presets triggered by MIDI Program change

# Preset management

New preset

Import a Rakarrack preset in rkr format

Export to Carla or Non Mixer XT

Compare changes made to default preset

Select set bank of presets

Switch between metronome and MIDI note detection

Hide unused effects

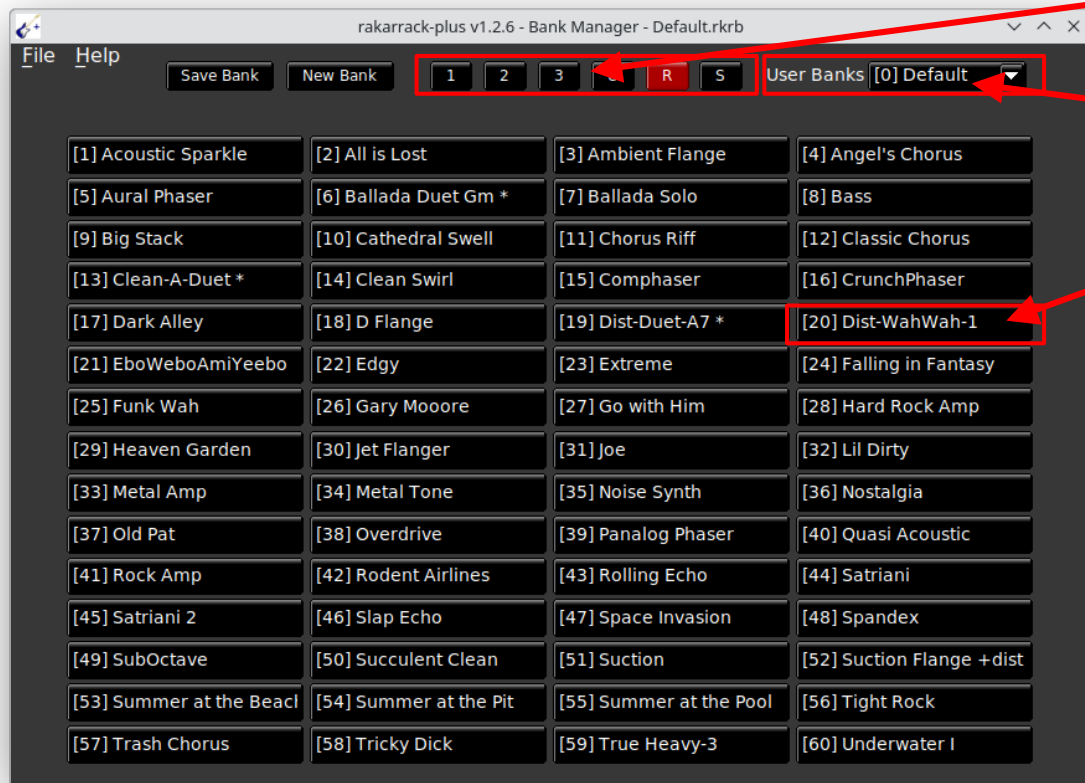

Change effects and reorder the effects in the preset

Fill randomly a preset

The screenshot shows the Rakarrack + software interface. At the top, there's a 'Presets' section with buttons for 'New', 'Import', 'Export', 'Compare', and 'Bank'. The 'Export' button has a dropdown menu showing 'Rakarrack+'. Above the 'Bank' button are four buttons labeled '1', '2', '3', and 'U'. Below the 'Presets' section is a 'Noise Synth' section with a 'Preset' dropdown set to '35' and a 'Random' button. The main display area shows 'Ryan Billing' and a 'Put Order in your Rack' button. At the bottom, there's a 'Rakarrack +' logo. Red arrows point from text labels to various UI elements: 'New preset' points to the 'New' button; 'Import a Rakarrack preset in rkr format' points to the 'Import' button; 'Export to Carla or Non Mixer XT' points to the 'Export' button; 'Compare changes made to default preset' points to the 'Compare' button; 'Select set bank of presets' points to the '1', '2', '3', and 'U' buttons; 'Switch between metronome and MIDI note detection' points to the 'Sw' button; 'Hide unused effects' points to the 'Hide' button; 'Change effects and reorder the effects in the preset' points to the 'Put Order in your Rack' button; and 'Fill randomly a preset' points to the 'Random' button.
